Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-17 and 19-38 are rejected under 35 U.S.C. 102(e) as being anticipated by Lee et al. Lee et al. teach a method for detecting fraud when facilitating a payment transaction over the Internet, the method comprises receiving sales information pertaining to the purchase of a product (121), receiving payment information from a buyer (304), performing an automated analysis (112) to determine if fraud exists, notifying the seller to send the product to the buyer (the fulfillment of the order) when no fraud exists and communicate to a human for fraud investigation when the analysis indicates potential fraud (104 and claim 7). It should also be noted that Lee et al. teach numerous fields including IP address, shipping address, billing address (Table 2) that are used in the automated analysis to determine fraud.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3627

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 18 and 39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lee et al. in view of Anderson et al. As noted above, Lee et al. teach all of the features of the claimed invention including sending communication to the seller; however, Lee et al. appears to be silent regarding sending communication to the purchaser. On the other hand, it is common for businesses to notify the purchasers that a transaction can not be completed due to processing flags which include overdrawn of an account, invalid or expired credit card number etc. Accordingly, it is believed that Lee et al teach sending a communication to the buyer. In order to specifically define such a teaching, Anderson et al. is submitted to show contacting a customer in the event of a problem (Fig. 3). Accordingly, to include a communication to the buyer in the event of a problem with the transaction in the Lee et al. system, as suggested by Anderson et al. would have been obvious for one having ordinary skill in the art at the

time of the invention. The motivation for such a modification is seen in col. 5, lines 40-50 which details how customer relations are improved.

Response to Arguments

Applicant's arguments filed November 17, 2003, have been fully considered but they are not persuasive.

In response to applicant's argument that the Lee reference fails to show where the location of the fraud detection takes place, it is noted that the features upon which applicant relies are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

...(1) Gopinathan et al., note col. 2, lines 26-42, which describes a fraud detection system that sends a communication to a human for further analysis; and
...(2) Baulier et al., note the fraud detection system.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
